QUESTIONS? Call DAISY today or visit the NEA website, www.nea-fast.com.

FastAttach™ enables healthcare providers to transmit attachments in support of electronic claims to insurance carriers via the Internet. Attachments are also stored for providers who desire this service. Types of attachments include: X-rays, lab reports, EOBs, narratives, operative reports, nurse and/or doctor notes, periodontal charts and any other document required to process a claim.

frequently asked questions:

HOW DOES FastAttach™ WORK?

FastAttach™ securely transmits electronic attachments through the Internet to NEA's repository. Once the attachment is received, a confirmation report is immediately transmitted back to the provider for tracking purposes. The attachments are stored for insurance carriers and are available to their consultants for review.

WILL FastAttach™ WORK WITH MY DENTAL SOFTWARE?

Yes. It does not matter what dental software you have as long as you have Windows 98, NT or higher. If you use DAISY, FastAttach™ works seamlessly from within the software.

HOW DO I KNOW IF I NEED TO SEND AN ATTACHMENT OR NOT?

A message box will inform you which procedures need attachments for each insurance carrier.

HOW DO THE ATTACHMENTS GET CONNECTED TO THE CLAIMS?

According to your software and claims clearinghouse, you will connect your attachments to the claims either manually or automatically with a simple tracking number in the remarks section of your electronic claim.

IF I HAVE A DIGITAL SYSTEM, WILL IT WORK WITH FastAttach™?

Yes. All digital X-ray systems can be easily used with FastAttach™.

IF I HAVE A DIGITAL X-RAY SYSTEM, DO I STILL HAVE TO HAVE A SCANNER?

You will not need a scanner for X-rays, but you may want to keep an inexpensive scanner on hand that can scan documents such as periodontal charts, EOBs or color images, such as intraoral photographs.

HOW DO I KNOW WHICH SCANNER OR DIGITAL X-RAY SYSTEM IS BEST FOR ME??

For advice on which hardware to purchase, contact DAISY at 1-800-368-6401. A representative can provide you comprehensive information and expert advice on both scanners and digital X-ray systems.

IS THE QUALITY OF A SCANNED X-RAY GOOD ENOUGH FOR THE INSURANCE CARRIER CONSULTANT?

The scanned X-ray cannot make a bad X-ray good. Therefore, assuming you are using a good original X-ray, the scanned image will be better than a duplicate X-ray.

HOW MUCH DOES FastAttach™ COST?

For a limited time, DAISY is offering registration for \$100 using the code **DAISY**. Otherwise, there is a one-time \$200 registration fee (which includes software, installation and training). FastAttach™ is \$25 per month and includes unlimited usage (no per attachment fee), unlimited telephone support and software upgrades at no additional charge. There are no hidden costs.

*Offer good through the end of 2010
